I understand that changing the divisor multiplies the result by that, but why doesn't changing the numerator cancel that out? I found out somewhere else since posting, is there a way to ...

For example, the sum of all numbers less than 1000 is about 500,000. So, 168,000  $\times$  500,000  $\times$  168,000  $\times$  500,000 or 84,000  $\times$  84,000 should be in the right ballpark. 76127 ...

1000 is the number of small cubes in the original cube. Each face of the original cube contains  $10 \times 10 = 100$  small cubes, so the effect of removing the ...

1 If a number ends with  $n$  zeros then it is divisible by  $10^n$ , that is  $2^n 5^n$ . A factorial clearly has more 2s than 5s in its factorization so you only need to count ...

A hypothetical example: You have a  $1/1000$  chance of being hit by a bus when crossing the street. However, if you perform the action of crossing the street 1000 times, then your chance of being ...

Number of ways to invest \$20,000 in units of \$1000 if not all the money need be spent Ask Question Asked 2 years, 11 months ago Modified 2 years, 11 ...
