in the Yangtze River Delta based on local characteristics. The primary features, key issues, and overall integration of the system are discussed. At the same time, the economic,...

For this purpose, this paper uses the super-efficiency SBM model, ML index and Tobit model considering undesired output to explore the energy efficiency and the main factors affecting it ...

This paper uses the two-stage NDEA-SBM model to calculate the energy, ecology, and economic (3E) efficiency of the Yangtze River Economic Belt (YREB) and analyze the spatial ...

As an important economic center of China, the YEB has become an indisputable "Golden Belt" for economic development. However, concurrently, the YEB is confronted with significant ...

It accounts for over 40% of the population, 40% of freshwater resources, and 45% of the country's economic output. Growth in the middle and upper reaches of the Yangtze River Basin (YRB) lags ...

Here, we focused on the Yangtze River Delta (YRD) urban agglomeration in China and proposed an optimization framework for energy, environment, and economy.

This paper is an attempt to investigate the logistics energy efficiency and main influencing factors of the Yangtze River Economic Belt, which is the ...

For this purpose, this paper uses the super-efficiency SBM model, ML index and Tobit model considering undesired output to explore the energy ...
