---

Discover our Data Centers & Server Room power protection, precision cooling, and IT equipment racks for industrial applications, small businesses, and homes.

At 50kW per rack, the physics become unforgiving: cooling requires 7,850 cubic feet per minute (CFM) of airflow at a 20°F temperature differential. ...

Hinged Wall Bracket is a mounting device that attaches a wall-mounted rack to a wall. It has adjustable pivots that allow the rack to be locked into a closed or open (90-degree ...

Master the art of data center server rack management with our ultimate 2024 guide. Rack selection, organization, and optimization with ENCOR.

Hyperscale data centers that specialize in high-performance computing (HPC) frequently reach over 50kW per rack because they support multiple high-intensity applications running ...

At 50kW per rack, the physics become unforgiving: cooling requires 7,850 cubic feet per minute (CFM) of airflow at a 20°F temperature differential. Double that to 100kW, and you need ...

Managing the cooling and power requirements of a 50kW rack density AI data center presents a unique set of challenges. In this blog post, we will explore effective ...

Discover proven cooling strategies for high-density AI and HPC racks from 50 kW to 1MW+. Learn how two-phase direct-to-chip cooling--adapted from advanced directed-energy ...
