What kind of energy does Chile use?

Chile has the potential to run exclusively on renewable generation, with an estimated energy mix of 46% solar, 31% wind, 12% hydroelectric, and 8% flexible natural gas power plants, as well as 23% of battery storage capacity. The remaining 2% is split between biomass, geothermal, and other less common energy sources.

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

Is lithium ion battery storage available in Chile?

While many projects are under development, lithium-ion battery storage is still limited. According to data from Acera, the Chilean Renewable Energy Association, there are only 64MW of battery storage capacity currently active, representing 0.2% of national capacity.

How much battery storage capacity does Chile have?

According to data from Acera, the Chilean Renewable Energy Association, there are only 64MW of battery storage capacity currently active, representing 0.2% of national capacity. AES Andes, a subsidiary of U.S. company AES Corp. operates all 64MW at their Angamos and Los Andes substations.

November 24, 2025 - Enel Chile, through its subsidiary Enel Green Power Chile, has initiated construction of the Las Salinas battery energy storage system (BESS), part of an industrial ...

This article explores how lithium-ion and flow battery technologies are reshaping Chile's power grid stability, enabling solar/wind integration, and creating new opportunities for industrial and residential ...

The paper discusses diverse energy storage technologies, highlighting the limitations of lead-acid batteries and the emergence of cleaner alternatives such as lithium-ion batteries.

The paper discusses diverse energy storage technologies, highlighting the limitations of lead-acid batteries and the emergence of cleaner ...

The paper discusses diverse energy storage technologies, highlighting the limitations of lead-acid batteries and the emergence of cleaner alternatives such as lithium-ion ...

Source: <https://spmgsa.co.za/Thu-11-Jul-2024-31842.html>

Enel Green Power Chile, an Enel Chile subsidiary, began constructing its new La Cabana wind farm, which also incorporates an innovative energy storage system using lithium ...

To address these issues, two major developments are planned -- the large-scale deployment of battery storage and the construction of the 3 GW Kimal-Lo Aguirre transmission line.

Storage project announcements are coming thick and fast as co-location with wind turbines offers cost efficiency and a smoother generation profile.
