Energy Storage and Distribution: The Edge's energy system efficiently stores and distributes electricity throughout the day. Excess energy ...

The Edge is the most sustainable office building on earth with a BREEAM-NL rating of 98.36%. A net zero energy building, The Edge produces 102% of its own energy.

Energy Storage and Distribution: The Edge's energy system efficiently stores and distributes electricity throughout the day. Excess energy generated is fed back into the grid, and ...

The Edge is a 14-storey office building in Amsterdam. Constructed in 2014, it was designed by PLP Architecture and created by EDGE Technologies ...

Thick load-bearing concrete and deeply recessed windows further regulate heat, reducing the need for shades. These features, combined with super-efficient ...

Thick load-bearing concrete and deeply recessed windows further regulate heat, reducing the need for shades. These features, combined with super-efficient solar panels on the south side, contribute to ...

The fact that it is built over a groundwater aquifer means that the building can draw from it, with thermal energy storage pumps which manage ...

Some key points: 1) The Edge was designed to be extremely energy efficient and reduce its environmental impact through innovations like solar panels, an aquifer ...
