Is this Victoria's biggest battery energy storage park?

British-owned energy company Pacific Green has secured Victorian government planning approval for what is set to become the state's biggest yet battery energy storage park.

Will Portland Energy Park be Australia's largest battery?

Joel Alexander, Managing Director of Pacific Green's Australian operations, said once built, the Portland Energy Park will be one of the largest batteries in the nation. "Once operational, Portland will stand as Australia's largest grid-scale battery, driving Victoria's energy transition forward," he said.

What is Australia's energy storage capacity?

Australia had 2,325 MW of capacity in 2022 and this is expected to rise to 22,076 MW by 2030. Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

How did Victorian Government approve the Portland Energy Park project?

Approval of the Portland Energy Park project was fast-tracked by the Victorian government through its Development Facilitation Program (DFP), which was expanded in April last year to include renewables, making them eligible for an accelerated pathway, and removing the planning panel process and third-party appeals.

GSL ENERGY's industrial energy storage systems are trusted by factories, logistics centers, and industrial parks worldwide to reduce electricity costs, enhance operational resilience, and accelerate ...

Pacific Green, a global battery energy storage company, has secured a planning permit for the development of a grid-scale battery energy ...

That's where modular energy storage systems with 10-year warranties come hopping to the rescue. Unlike rigid traditional setups, these LEGO-like power banks let manufacturers tackle peak demand ...

The Portland Energy Park, providing up to 1GW of firming capacity, will be developed in phases over the next 36 months. Once constructed, it will become Australia's largest battery energy ...
