What is a MDU enclosure?

Our top-hinging, medium-security MDU enclosure provides protected access for multi-dwelling fiber or telecom equipment and features a durable powder-coated design, secure hinged door, ample cable routing space, and flexible mounting options for broadband and telecom distribution needs.

What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What are telecommunications enclosures?

Telecommunications enclosures are protective cabinets or racks designed to house communication equipment such as fiber optics, switches, and power systems. Their primary purpose is to shield these components from external threats, including environmental conditions, physical damage, and unauthorized access.

How do I choose a telecommunications enclosure?

Proper installation of telecommunications enclosures is essential to their performance and longevity. Select an appropriate site that meets environmental and logistical needs, whether indoors or outdoors.

The Connector TE is a stainless steel termination enclosure with a screw on lid ideal for applications where a smaller enclosure is required for installing terminations or push buttons.

At AZE Telecom, we specialize in designing and manufacturing weatherproof outdoor electrical enclosures and outdoor enclosures for electrical equipment that ensure your systems remain ...
