---

Located in the bustling industrial area of Belgrade, this 120 kW project leverages the robust power of SpolarPV's 455W modules. ...

In Batajnica, near the highway to Novi Sad, an unusual solar power plant with a capacity of 10 kilowatts has recently been put into operation. This plant belongs to the first residential ...

UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia.

The area around Belgrade is also fairly sunny throughout the year, making it a great location for solar power generation. Additionally, areas near bodies of water (such as rivers or lakes) could be used to ...

Turkey-based developer and IPP Fortis Energy has acquired a solar and battery energy storage system (BESS) project in Serbia. The company plans to begin construction at the project, in ...

The Government of Serbia has signed an agreement with the Hyundai Engineering-UGT Renewables consortium on building solar power plants with a total connection capacity of 1,000 MW ...

This project not only addresses energy reliability but also showcases how urban centers can integrate solar power at scale. Let's explore how this system works, its benefits, and what it ...

The preparation of documentation is going as planned and the first works on the project in Serbia for solar power plants of 1 GW in total and batteries is expected by early ...
