What is a 750 kW Bess system?

The 750 kW BESS project at the PECC2 Innovation Hub in Ho Chi Minh City is an example of this. Commercial & Industrial (C&I) BESS can be used within large industrial facilities and data centers for demand charge reduction, back-up power and energy optimization. The 1,850kW BESS system installed at Vinpearl Nha Trang in 2024 is an example of this.

What is a Bess system?

The 1,850kW BESS system installed at Vinpearl Nha Trang in 2024 is an example of this. Off-grid/remote BESS are key for islands or rural areas that do not have reliable grid access. These are often combined with solar or diesel generators.

What is a commercial & industrial Bess system?

Commercial & Industrial (C&I) BESS can be used within large industrial facilities and data centers for demand charge reduction, back-up power and energy optimization. The 1,850kW BESS system installed at Vinpearl Nha Trang in 2024 is an example of this. Off-grid/remote BESS are key for islands or rural areas that do not have reliable grid access.

What is a Bess project?

A BESS project offers multiple revenue streams. A common revenue model for a BESS project is to secure income through long term arrangements - such as a tolling agreement, capacity market contracts or ancillary service arrangements - which can emerge as a viable commercial model in Vietnam.
