As Bosnia targets 55% renewable energy by 2035, storage systems like Banja Luka's will become the grid's backbone. The project serves as both technical solution and economic catalyst - proving that ...

The City of Zenica in Bosnia and Herzegovina issued a call for applications and bids for the right to install an energy storage facility in the ...

Bosnia and Herzegovina is a self-sufficient, net exporter of electricity. However, its energy sector relies mostly on fossil fuels, in addition to hydro and a negligible level of renewables.

Construction has started on a significant solar energy project in Bosnia and Herzegovina, marking a step toward expanding renewable energy in the region. The 125 MW solar plant is being built ...

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

The system will address mid- and long-term storage capacities, ensuring flexibility and reliability in the power system. The WBIF provides technical assistance for developing the concept, ...

Licensing and feasibility studies are already underway - the goal is to create a modern, resilient and green energy infrastructure. This is not only a technological development, but a strategic ...

The City of Zenica in Bosnia and Herzegovina issued a call for applications and bids for the right to install an energy storage facility in the Zenica 1 business zone. The site is construction ...
