The Boston Community Solar Cooperative is working to build a future powered by the sun and owned by the community. Their goal is to write a new chapter in Boston's energy story.

Who can install or replace solar panels? Homeowners and contractors can apply for the Short-form or Long-form Permit. Only a contractor with a valid, non-expired Massachusetts trade ...

From financing to design and installation, Boston Solar does it all. Our in-house installers are licensed and certified, meaning you can rest assured that your solar meets the most rigorous standards.

Their plan is to place a solar project on the roof of the Dorchester Food Co-op and launch a community-owned solar cooperative. Advocates say this will bring energy equity to Boston's low ...

Case in point, BCSC's very first solar installation will be built on an affordable housing building, which is also the home of Dorchester Food Co-Op, combining the life-giving resources of housing, food, and ...

Once the building permit is received, the contractor will install the solar system. If your building is within the City of Boston, the system then must be inspected by city personnel, and subsequently by your ...
