Is lithium a critical energy resource in Chile?

The global and regional significance of lithium as a critical energy resource is examined. The evolution of Chile's lithium industry is analyzed, emphasizing two recent key policy initiatives: the 2015 National Lithium Commission report and the newly launched national lithium strategy. The salient features of these initiatives are outlined.

Who owns the lithium industry in Chile?

Currently, the primary players in Chile's lithium industry are SQM, accounting for approximately 65% of production, and Albemarle, holding 35%. Both companies operate in the Salar de Atacama, where they control 34% of the world's lithium supply, equivalent to approximately 44 000 tons.

Does Chile have a national strategy for lithium production?

Chile is positioned to lead global technological advancements in lithium production and capitalize on the associated economic benefits for national and regional development. Therefore, a national strategy is essential to effectively seize these opportunities. 3.4.1.

Which Chilean centers are focusing on developing lithium technologies?

Another Chilean center focused on developing lithium technologies is the Advanced Mining Technology Center (AMTC), located at the University of Chile. Research has been focused on new sustainable technologies for lithium brine processing and direct LiOH production.

Discover how Chile increased lithium resources by 28% to 14.05 million tons, strengthening its global energy transition role.

Expanding the lithium value chain in Chile: Mining, batteries, and recycling in other regions. The trajectory of Chile's lithium mining industry is important for both the country's sustainable economic ...

By addressing these challenges, Chile has the potential to solidify its role as a key player in the global lithium market while promoting sustainable industrial practices.

A new ICCT-CMS report outlines a roadmap for Chile to evolve from lithium exporter to regional battery production hub, generating billions in ...

In March 2024, Atlas Renewable Energy announced it has signed a power purchase agreement (PPA) with

Chilean mining giant Codelco for the supply of 375 GWh of energy per year, to ...

Andesvolt is a Chilean manufacturer that specializes in Battery Energy Storage Systems (BESS) using lithium-ion batteries, designed for applications such as ...

Through the deployment of cutting edge battery storage technology, Fluence is not only addressing the technical challenges of Chile's energy transition but also contributing to the nation's broader ...

A new ICCT-CMS report outlines a roadmap for Chile to evolve from lithium exporter to regional battery production hub, generating billions in revenue and thousands of clean-tech jobs by ...
