Schneider Electric and NVIDIA partner to create sustainable, AI-ready data center solutions, combining liquid cooling, efficient power systems, and modular designs to support next-gen AI infrastructure.

Let's face it - traditional air-cooled energy storage systems are like trying to cool a volcano with a desk fan. As grid-scale projects balloon in size and battery densities skyrocket, liquid ...

Let's face it - traditional air-cooled energy storage systems are like trying to cool a volcano with a desk fan. As grid-scale projects balloon in size and battery densities skyrocket, ...

Schneider Electric and NVIDIA partner to create sustainable, AI-ready data center solutions, combining liquid cooling, efficient power systems, and modular designs to support next-gen AI ...

Active water cooling is the best thermal management method to improve the battery pack performances, allowing lithium-ion batteries to reach higher energy density and uniform heat dissipation.

Copenhagen's district heating relies largely on biomass and waste incineration power plants, but net-zero carbon targets are now encouraging suppliers to harness energy from renewables ...

With 15 years specializing in thermal management solutions, EK SOLAR has deployed 850+ liquid-cooled energy storage systems across 23 countries. Our patented PhaseCool(TM) ...

Schneider Electric and NVIDIA partner to create sustainable, AI-ready data center solutions, combining liquid cooling, efficient power systems, and modular designs to support next-gen AI infrastructure.
