Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a EUR1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

Is a 2023 capacity auction a big step forward for Polish energy storage?

It looks to be a big step forward for the Polish energy storage market, which is already advancing into a leading position among Central and Eastern European markets, driven forward by a 2023 capacity market auction in which 1.7GW was awarded to energy storage bids.

What is the electricity storage support scheme?

The electricity storage support scheme aims to facilitate the reduction of fossil fuel use and the increased penetration of renewable energy on the Polish grid. Systems with 4MWh capacity or higher will be eligible, connected to either transmission or distribution networks at all voltage levels.

How does Europe support energy storage?

Over the last year or so, the European Union has approved state aid schemes to support energy storage deployments in countries. These include a EUR103 million package of direct grants in Romania in March 2023, EUR150 million for renewables and storage in Slovenia and EUR1.1 billion for Hungary a couple of months later.
