With an ambitious roadmap, RES Croatia has been a key player in promoting renewables in Croatia since 2016, representing a range of technologies from solar and wind to ...

Over the past decade, Croatia has emerged as a leader in renewable energy integration, particularly in combining wind farms and solar parks with advanced battery storage systems.

The project has been operational since 2018. It includes 16 GE turbines with an installed capacity of 49 MW, generating enough electricity to serve nearly 11,000 ...

With an ambitious roadmap, RES Croatia has been a key player in promoting renewables in Croatia since 2016, representing a range of technologies from solar and wind to biomass and ...

Croatia is rapidly advancing its energy storage projects to support renewable integration and grid stability. This article explores the country's initiatives, challenges, and opportunities in energy ...

Ramping up solar and wind to 5 GW and 4.2 GW, respectively, can help Croatia well achieve its 100% renewable energy goal by 2030, says a new study by Greenpeace.

This will significantly enhance the flexibility of Croatia's power grid and enable the integration of a greater share of intermittent renewable energy ...

Ramping up solar and wind to 5 GW and 4.2 GW, respectively, can help Croatia well achieve its 100% renewable energy goal by 2030, says a new ...
