The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's energy...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time balancing of ...

Croatian firm IE-Energy and Slovenia's NGEN are developing a battery system for smart energy storage, with a total operating power of 60 MW and a capacity of 120 MWh.

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant ...

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations.

The European Bank for Reconstruction and Development (EBRD) said on October 22 it will invest EUR16.8mn in Croatia's first large-scale battery energy storage system and virtual power plant,...
