What is an outdoor telecom enclosure?

The outdoor telecom enclosures, which are also referred to as telecommunications cabinets, are fully enclosed cabinets that help protect electrical cabling and other equipment from potentially damaging environments. Such damage can be caused by dust, rain, ice, and external heat. What do you need to know about outdoor telecom enclosures?

What is a telecommunications enclosure?

Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments. These purpose-built cabinets are engineered to protect susceptible telecommunications equipment, such as routers, switches, power supplies, and network components, from environmental elements and potential security threats.

Why do you need a telecom enclosure?

Provide complete protection and security for your telecoms equipment with steel enclosures and GRP cabinets by the Eldapoint Group. Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments.

What is the IP55 specification for outdoor telecoms street enclosures?

We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel. Compliance with IP (Ingress Protection) ratings and NEMA (National Electrical Manufacturers Association) standards certifies their ability to withstand environmental conditions and protect sensitive equipment.

We design and manufacture steel and GRP telecommunications field cabinets for housing roadside telecommunications and IT equipment. Our outdoor weatherproof IP-rated enclosures come in ...
