What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

Are lithium ion batteries a viable energy storage solution?

Batteries, in particular lithium ion batteries, are among the most well-known and economically feasible technologies for energy storage. As of today it is the only realistic solution for batteries in electric cars, mobile phones and similar mobile devices. But there is a downside.

Can Denmark deliver to a green transition in energy storage & conversion?

But if Denmark really shall deliver to the green transition within energy storage and conversion, in times characterized by extreme pace and changeability, we must stand together and walk together. DaCES ensures the necessary cohesion that makes it happen. Lars Ottosen, Head of Department and Professor, AU Biological and Chemical Engineering

What are battery enclosures & cabinets?

Battery enclosures and cabinets are a safe way to store batteries and to protect them from the elements as well as providing a line of defense against theft.

Think of their energy storage systems as the "sandwich" of power solutions - carefully layered technologies that keep the national grid as stable as a well-balanced open-faced sandwich.

A compact and scalable battery storage system delivered by Danish specialists Our partnerships combined with RESS A/S" skills within business development, technical sales and sourcing creates a ...

DaCES is a unique platform within energy storage and conversion where Danish universities and companies work closely together to develop disruptive technologies and training courses, among ...

While Danish energy storage battery costs vary by scale and technology, the country's innovative ecosystem delivers unmatched value. With prices projected to drop another 18-25% by 2026, ...

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids,
