Based on digital technologies such as the Internet of Things, AI big data, and 3S homology, we create the D-Galaxy series of smart cloud platforms and build a cloud-edge-end collaborative system to ...

In the islanded DC Microgrid (MG) with the significant presence of renewable energy sources (RES), the integration of energy storage units (ESU) becomes crucial in mitigating the ...

Abstract: For the flexible regulation requirements of new power systems with a high proportion of new energy, this paper proposes a multi-point distributed energy storage system control...

In the islanded DC Microgrid (MG) with the significant presence of renewable energy sources (RES), the integration of energy storage units (ESU) becomes crucial in mitigating the stochastic and ...

Based on digital technologies such as the Internet of Things, AI big data, and 3S homology, we create the D-Galaxy series of smart cloud platforms and build a ...

Distributed Energy Resources New energy policies, cost-effective technologies, and customer preferences for electric transportation and clean energy are transforming power ...

Distributed Energy Resources New energy policies, cost-effective technologies, and customer preferences for electric transportation and clean energy are transforming power system ...

In order to maximize the utilization of renewable energy, enhance its utilization efficiency, and reduce the carbon emission of power supply, this paper first proposes a real-time collaborative ...
