The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a ...

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations.

Croatia plans to install 600 MW of storage capacity by 2030 - enough to power 400,000 homes for a full day. The current project represents 26% of this national target.

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.

Croatia is rapidly advancing its energy storage projects to support renewable integration and grid stability. This article explores the country's initiatives, challenges, and opportunities in energy storage ...

As a well-connected part of Southeast Europe's power system, with extensive interconnectors, Croatia now faces the central challenge of integrating battery storage into the grid ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

Summary: Croatia is rapidly adopting centralized photovoltaic (PV) energy storage systems to stabilize its renewable energy grid. This article explores the country's progress, key projects, ...
