We work with companies to custom manufacture seismic cabinets to fit their requirements. Working with Juniper, we manufactured this custom seismic rack to fit their MX2020 router, which is a 45RU high. ...

Seismic rack cabinets are robust enclosures designed for use in earthquake-prone areas. These cabinets feature reinforced steel structures and specialized connection elements to withstand shocks ...

Seismic Rack Cabinets are engineered to protect critical IT and networking equipment in earthquake-prone areas. Built with reinforced construction, they offer stability, durability, and ...

Our EZ Seismic Cabinet is a tested, high-capacity solution engineered to keep mission-critical hardware protected, organized, and secure in even the most ...

We work with companies to custom manufacture seismic cabinets to fit their requirements. Working with Juniper, we manufactured this custom seismic rack ...

This paper seeks to summarize the recent technological advances in the research and development of seismic resilient steel structures (as many novel techniques are most easily applied ...

Our EZ Seismic Cabinet is a tested, high-capacity solution engineered to keep mission-critical hardware protected, organized, and secure in even the most demanding seismic environments.

We offer design services and solutions to meet the needs of any seismic cabinet specification. Everything from material cutting to welding, machining, and fabrication is all handled in house ...
