I have been trying to add emc values to items from applied energistics 2 For instance the gold processor:
S:appliedenergistics2:item emMultiMaterial E:2138 M:22 When I go back in game ...

The LZY solar battery storage cabinet is a tailor-made energy storage device for storing electricity generated through solar systems. They assure perfect energy management to continue power ...

The blaze rod trick is what is usually done. For late game, I usually set up an EMC system that spits out gold picks that have only the tiniest bit of durability left, then dump picks into an ...

Emc links are very useful as they allows you to pull items from and put items into your emc storage. They are great for automating most processes. To make a emc link take out items, they ...

Energy storage cabinets help in balancing energy supply, improving grid stability, and offering backup power during outages. They are crucial in ...

All-in-one, high-performance energy storage system for various industrial and commercial applications. Highly suitable for all kinds of outdoor applications such as EV charging stations, industrial parks, ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

Your first thing to invest emc into are a watch of flowing time and a dark matter pedestal. This will gives bonus ticks to all blocks in a 7x7x7 cube around the pedestal block. They stack but ...
