What does the new energy regulation mean for Europe?

On 18 October 2022, the Commission proposed a new emergency regulation to address high energy prices and ensure the security of supply for the coming winter, aiming to enhance solidarity through better coordination of joint gas purchasing.

How has Russia impacted the EU's energy crisis?

Russia's unjustified military aggression against Ukraine and its weaponisation of gas supplies have provoked an unprecedented energy crisis for the EU. This has led to sharp rise in energy prices and brought hardship for Europeans.

Why did the EU implement emergency measures in 2022?

In response, the EU implemented emergency measures in 2022, to stabilise the energy prices and ensure access to gas supply during the winter. Looking ahead the Commission is now focusing on addressing persistently high energy costs that impact EU citizens and businesses.

How can the EU ensure a secure and affordable supply of energy?

A key part of ensuring secure and affordable supplies of energy involves diversifying supply routes. In the past years the EU has been working with international partners to diversify supplies. Since 2022, the Commission has established agreements with Egypt, Israel and Azerbaijan to export natural gas to Europe.
