How big is Europe solar photovoltaic (PV) market?

The Europe Solar Photovoltaic (PV) Market is expected to reach 330.95 gigawatt in 2025 and grow at a CAGR of 12.30% to reach 591.10 gigawatt by 2030.

How big is the EU PV market in 2024?

Trends in EU PV Installations (2024-2025) The EU PV market demonstrated steady yet modest growth in 2024, with an estimated 64 to 65 GWdc of new PV capacity installed - a slight increase of ~5% compared to the 61.9 GWdc installed in 2023, according to EUPD Research calculations.

Which sector dominated the European solar PV market in 2024?

However, the utility-scale sector dominated in 2024, capturing 42% of the market - an increase from 36% in 2023 and its strongest performance in the past five years. The European solar PV market is poised for continued growth, but the explosive expansion driven by the energy crisis is now subsided.

Who owns the European solar photovoltaic (PV) market?

The European solar photovoltaic (PV) market is fragmented. Some of the major companies in the market (in no particular order) include Hanwha Q CELLS Technology Co. Ltd, Iberdrola SA, SunPower Corporation, JinkoSolar Holding Co. Ltd, and Lightsource BP Renewable Energy Investments Limited. Image &#169; Mordor Intelligence.

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights ...

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

This year's report features an overview of EU solar hot topics in 2024, which includes relevant updates for the solar PV sector at the upstream, downstream and legislative level.

The price of solar PV modules has decreased significantly over the past decade, with the cost of solar power falling below grid parity in many parts of Europe, ...

Germany, with the largest installed capacity of solar photovoltaics, is expected to dominate the European solar photovoltaics (PV) market during the forecast period.

In 2024, Germany was the country with the highest electricity generation from solar photovoltaics, amounting to more than 74 terawatt-hours. ...

In 2024, Germany was the country with the highest electricity generation from solar photovoltaics, amounting to more than 74 terawatt-hours. That is roughly one-fourth of the total ...

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, ...
