The project aims to enhance energy supply security and mitigate risks of outages, while also facilitating the integration of renewable energy sources into Ukraine's national grid.

Completed in only six months, the project was commissioned entirely remotely. Ukrainian private utility DTEK has energised the largest ...

The project was developed in partnership with American energy company Fluence Energy Inc. The 200-megawatt system spans six locations across Ukraine and represents one of Eastern ...

Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Collectively, they ...

This project is located in the Kyiv region of Ukraine and is designed for a local factory. The system consists of 4 units of 50kWh and 2 units of 100kWh energy storage cabinets, primarily to address ...

In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage ...

The project was developed in partnership with American energy company Fluence Energy Inc. The 200-megawatt system spans six locations ...

In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage project: 200 megawatts / 400 megawatt-hours of ...
