What is a good IP rating for a DC charging station?

For indoor charging stations, a lower IP rating like IP44 might suffice. However, for outdoor DC fast charging stations, a higher rating such as IP65 or IP67 is advisable. This ensures the chargers remain functional and safe in harsh conditions, supporting a reliable business model.

How do I choose the right IP rating for my charging station?

Selecting the appropriate IP rating depends on the installation environment and usage conditions. For indoor charging stations, a lower IP rating like IP44 might suffice. However, for outdoor DC fast charging stations, a higher rating such as IP65 or IP67 is advisable.

Why should you choose IP65 & IP68 EV chargers?

Go for IP65+ to prevent salt/water damage. ? Extreme weather zones? IP67/IP68 ensures reliability in storms/floods. By choosing the right IP rating, businesses can boost charger lifespan, reduce maintenance costs, and enhance safety --critical for scaling EV infrastructure.

Why is ip67/ip68 important for EV charging?

IP67/IP68 ensures reliability in storms/floods. By choosing the right IP rating, businesses can boost charger lifespan, reduce maintenance costs, and enhance safety --critical for scaling EV infrastructure. Need Future-Proof EV Charging Solutions?
