Can you finance a battery storage project?

Energy can be stored in a number of ways, depending on the source, but the most common is in chemical batteries. In this briefing, we look at some of the considerations for financing battery storage projects. Why chemical batteries? They are easily scalable.

Does project finance apply to energy storage projects?

The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects. Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project.

Are government subsidies for battery storage a viable revenue stream?

The available government subsidies for battery storage in the UK do not currently form a sufficiently significant and stable revenue stream to ensure battery storage project financings are fundable on the basis of capacity market or ancillary services alone.

Is battery storage a good investment?

Battery storage has less of a track record than other renewable energy assets such as solar and wind power. The lack of comfort on the part of lenders has meant that the project financing packages available have been generally unappealing, with low gearing and onerous covenants.

Pursue private financing to procure and implement the microgrid. UESCs and ESPCs may include operations and maintenance, repair and replacement, and measurement and verification as added ...

It looks at common types of energy storage projects, the typical financing structures and the principal requirements for obtaining financing. It also highlights the key points that parties should consider ...

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an ...

In this article we consider the role and application of battery energy storage systems (BESSs) in supporting renewable energy power generation and ...
