The Georgetown Project marks the first of four Alberta projects of Westbridge to receive power plant and BESS approval from the AUC. The approvals allow Georgetown to construct and ...

As global energy demands rise and renewable technologies advance, Georgetown stands at the crossroads of innovation. This article explores how photovoltaic systems and energy storage ...

The Georgetown Project marks the first of four Alberta projects of Westbridge to receive power plant and BESS approval from the AUC. The ...

The project would pair a solar PV plant of up to 230MWac/278MWdc with up to 200MWh of battery storage sharing the site and interconnection to the ...

Partnering with Leyline strategically bridges the gap between development and construction on our flagship project Georgetown Solar PV and has allowed us to fund the security payment for the ...

This article explores the composition of Georgetown's advanced systems, their applications across sectors like renewable energy and industrial operations, and real-world case studies demonstrating ...

The battery storage project is expected to have a long lead time, but its potential benefits are substantial. One of the primary advantages highlighted is the ability to integrate battery storage with ...

Westbridge's Georgetown solar and energy storage project receives approval from Canadian authorities. In addition, the project will benefit from a connection to the Mossleigh 1051S substation.
