Robust electrical systems and fire-resistant materials for high-temperature and high-pressure tolerance. Our outdoor cabinet is IP66 constructed in a environmentally controlled liquid ...

Empower your off-grid projects and grid-support applications with a reliable outdoor battery storage cabinet from TOPBAND. Engineered for harsh climates and demanding workloads, ...

Our outdoor cabinets with single doors are ideal for compact battery systems. The installation of a filter fan allows waste heat to be dissipated via the double-walled construction.

Our outdoor cabinets with single doors are ideal for compact battery systems. The installation of a filter fan allows waste heat to be dissipated via the ...

Besides, as a battery storage cabinet with a maximum energy efficiency of up to 91%, the product ensures a reliable power supply for different C& I energy storage applications.

Designed with high integration density in mind, our system features a modular design that seamlessly adapts to inverters with voltage ranging ...

Our 200KWh outdoor cabinet energy storage system features a battery pack system enclosure with triple fire protection. With independent relay protection and battery-level thermal monitoring, you can ...

Designed with high integration density in mind, our system features a modular design that seamlessly adapts to inverters with voltage ranging from 600V to 1500V.
