The portfolio offers certified and ready-to-use cabinets for PV power plants that meet the specific environmental, electrical and data transmission requirements according to customer specifications.

One 50kWh energy storage cabinet can meet the power demand of three standard base stations throughout the day, replacing traditional diesel power generation, ...

Outdoor base station cabinets are not like big indoor battery racks or electrical enclosures in the sense that they are weatherproofed. They have the majority carrying IP55 or higher protection ...

Switzerland's reputation for precision engineering extends to its outdoor energy storage solutions. These cabinets are built to withstand harsh weather, from alpine winters to humid summers, ...

These cabinets are designed with a focus on modularity, safety, and efficiency, making them ideal for both utility-scale storage and distributed energy resources (DERs).

Solar modules power telecom cabinets by converting sunlight into electricity and provide reliable backup energy, even in remote areas. High temperatures and humidity can ...

Switzerland's reputation for precision engineering extends to its outdoor energy storage solutions. These cabinets are built to withstand harsh weather, from alpine winters to humid summers, while ensuring ...

One 50kWh energy storage cabinet can meet the power demand of three standard base stations throughout the day, replacing traditional diesel power generation, saving more than 100,000 ...
