The Symtech Solar Battery Energy Storage Cabinet (MEG 100kW x 215kWh) is a fully integrated, PV-ready hybrid energy storage solution designed for both on-grid and off-grid applications.

Provide stable power supply for villages and pastures without electricity, support centralized energy storage of household photovoltaic systems, and solve the power consumption problems of lighting, ...

Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an IP55-rated cabinet for enhanced protection against water ...

Combines high-voltage lithium battery packs, BMS, fire protection, power distribution, and cooling into a single, modular outdoor cabinet. Uses LiFePO4 batteries with high thermal stability, extensive cycle ...

Designed for commercial, industrial, and microgrid applications, it integrates a 30kW PCS with a 60kWh LiFePO4 battery bank to provide safe, efficient, and reliable power storage.

The Cabinet offers flexible installation, built-in safety systems, intelligent control, and efficient operation. It features robust lithium iron phosphate (LiFePO4) batteries with scalable capacities, supporting on ...

With multiple protection and alarm functions such as over-current, over-voltage, and over-temperature, the system has high reliability, and the power system can realize local or remote ...

Featuring 215kWh of LiFePO4 storage and a 120kW PCS, this system is engineered for industrial parks and commercial complexes that require high-power energy management.
