How much does a solar system cost?

An average-sized residential system has dropped from a pre-incentive price of \$40,000 in 2010 to roughly \$20,000 today." Keep in mind, there is a federal solar tax credit available to all US homeowners through the end of 2025, worth 30% of the cost of going solar.

Are home solar systems expensive?

Home solar systems have an outdated reputation for being an expensive luxury item that only wealthy homeowners can afford. However, the cost of solar has plummeted in the last several decades and there are state and federal incentives that make it accessible to many homeowners. According to the Solar Energy Industry Association:

How do I compare the cost of going solar?

But there are two ways to compare the cost of going solar. The first method is Price Per Watt (PPW). This measurement is best used to compare multiple solar quotes, and the formula to calculate it is pretty simple. Just take the gross cost of the system and divide by the size (in Watts).

How are solar installers vetted?

Vetted local installers. Solar companies are rigorously vetted before joining our network. The vetting process includes a look at the company's financials so we know they are operating on solid footing. In the end, fewer than 30% of the installers that apply are accepted into our network.
