What are the different types of battery procurement agreements?

There are primarily three types of agreements relevant to battery procurements: (1) purchase agreements, (2) master supply agreements (MSAs), and (3) capacity reservation agreements (CRAs).

Can a developer supply a battery energy storage system?

In this context, a developer will often seek to enter into a supply agreement for the Battery Energy Storage System ("BESS"), which will then be supplied to the civil works contractor for installation and commissioning.

What happens if a battery procurement is delayed?

Delays in the procurement of batteries could lead to failures to comply with regulatory mandates, or, for utilities opting to install storage as NWA in place of other system upgrades, the failure to implement necessary system improvements.

What is a battery energy storage system checklist?

Checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

In this context, a developer will often seek to enter into a supply agreement for the Battery Energy Storage System ("BESS"), which will then be supplied to the civil works contractor for...

A well-structured BESS procurement contract minimizes risks and ensures project success. By clearly defining technical specifications, payment terms, warranties, delivery timelines, testing requirements, ...

The negotiation of an engineering, procurement and construction (EPC) agreement for a battery energy storage systems (BESS) project typically surfaces many of the same contractual risk ...

The checklist items contained within are intended for use in procurement of commercial scale lithium-ion BESS, although they may be used ...

Our procurement framework... is focused on local knowledge-building, coordination, and preparation for making the most of external support. We assume utilities will work with upstream partners, ...

The balance of this paper identifies key types of procurement contracts and the key risks that must be allocated
