KannurKeltron sets up India's first supercapacitor manufacturing facility, with high energy storage capabilities and technical support from ISRO.

Discover the latest emerging energy storage technologies in India. Learn their benefits, applications, and how they are shaping a clean energy future in 2025.

Three initiatives, regulations or policies related to decentralised energy storage have been updated or introduced by the relevant agencies at the national or state level.

Energy Storage Systems (ESS) can be used for storing available energy from Renewable Energy and further can be used during peak hours of ...

Energy Storage Systems (ESS) can be used for storing available energy from Renewable Energy and further can be used during peak hours of the day.

Indian Scientists have developed a high-energy density aqueous supercapacitor with a wide electrochemical window, high stability as well as high energy retention.

SPEL is India's first manufacturer of Ultra Low ESR Polymer Film Capacitor, EDLC-Supercapacitor, Lithium Ion Capacitor, Hybrid Lithium Ion Battery Capacitor and Advance Lithion Ion Battery. The ...

This state-of-the-art energy storage solution is designed to support India's clean energy transition and strengthen the reliability of country's power infrastructure.
