Explore how international collaboration is accelerating India's solar manufacturing and green hydrogen push, positioning the country as a global clean energy hub.

Solar Energy Corporation of India (SECI), a public sector undertaking, is responsible for the development of solar energy industry in India. Hydroelectricity is administered separately by ...

Inside the world's largest renewable energy park - proof the green transition isn't dead Stuti Mishra reports from a site in western India that's roughly seven times larger than ...

India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in ...

What are the top renewable energy sites in India for solar power projects? Top renewable energy sites include areas with high solar insolation where extensive solar parks are developed and ...

India is developing a 30 gigawatt hybrid -- wind and solar -- renewable energy project on one of the largest salt deserts in the world. (AP Photo/Rafiq Maqbool)

Explore India's growth in renewable energy with IBEF. Dive into the growth of solar in India and other renewable energy sources shaping India's green future.

All time maximum solar and wind power generation is 65,804 MW and 28,974 MW as of 7 March 2025 respectively. India ranks 5th globally for installed hydroelectric power capacity. As of 31 March 2020, India's installed utility-scale hydroelectric capacity was 45,699 MW, or 12.35% of its total utility power generation capacity.
