Who benefits from industrial solar panels?

High energy users benefit the most, but even those with standard energy use see substantial savings with industrial solar panels. We serve a wide range of businesses, including Stewart Golf, a leading manufacturer of golf trolleys.

Can industrial buildings use solar panels?

Industrial buildings offer straightforward roof spaces which are ideal for solar panels. Businesses can significantly reduce their overheads by generating their own electricity from solar energy. Mypower excels at installing high yielding quality industrial solar panels which have won awards for their design and efficiency.

How big are industrial solar panels?

Usually around 1.8m by 1.1m Industrial solar panels are typically around 1.8m by 1.1m in size. In some situations, such as utility scale installations, it makes sense to use slightly larger panels that are around 2.3m by 1.1m in size.

Are industrial solar panels a good investment for your business?

Depending on the electricity demands of the site and availability of suitable roof space, industrial solar PV systems can provide a significant volume of low-cost clean energy to a business. For example, a 500kWp (approx. 1,200 panels) system in the UK will typically generate over 400,000kWh of electricity per annum.
