How much does a grid-tied solar system cost?

Grid-tied solar dominates the market for good reason: With 2025 system costs ranging from \$2.50-\$4.00 per watt installed and federal tax credits of 30% through 2032, grid-tied systems offer the fastest payback periods (6-10 years) and highest returns on investment without requiring expensive battery storage.

Do grid-tied solar systems reduce electricity bills?

While grid-tied systems reduce electricity bills, they don't provide true energy independence since you remain connected to and dependent on the utility grid. Installing a grid-tied solar system involves multiple steps, from initial design through final utility interconnection.

Can I pay for my solar system over time?

We offer the ability to pay for your solar purchase over time through a retail installment contract with Tesla Financing. Design your Tesla solar system. After you have placed your order, complete the necessary action items in your Tesla Account.

Should you pay for a solar energy system with cash?

Some homeowners opt to purchase their solar energy systems with cash, forgoing the need for loans or payment plans. While this is a major investment, there are solid benefits to paying for a solar energy system with cash. Pros
