Is there a secret radio in a solar inverter?

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems.

Are Chinese solar inverters connected to the power grid?

U.S. officials have discovered undisclosed communication devices on the power inverters of some Chinese-manufactured solar panels, Reuters reported today based on anonymous sources within the federal government. The inverters are part of the hardware package connecting solar arrays to the power grid.

Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented "rogue" communication devices hidden inside solar power inverters imported from China.

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

With this solar-powered solution, telecom operators can reduce their reliance on the grid and ensure uninterrupted communication services even in remote areas. This telecom cabinet is equipped with a ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating ...

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar

panels and wind turbines to electricity grids.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Discover how a grid-connected photovoltaic inverter and battery system enhances telecom cabinet efficiency, reduces costs, and supports eco ...

These undocumented communication modules offer an invisible back door into devices that regulate a growing share of the world's electricity. "It effectively ...
