In Japan, microgrids are at the heart of initiatives aimed at building a sustainable energy infrastructure. The adoption of advanced technologies, including smart grids and innovative battery ...

Mutsuzawa Smart Wellness Town established a cogeneration system using locally produced natural gas and a microgrid of locally operated power lines. The roadside station has also ...

Sumitomo Electric has inaugurated a vanadium redox flow battery (VRFB) system at a community solar microgrid in southern Japan.

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids.

Looking ahead, PowerX remains dedicated to supporting corporate decarbonization initiatives and bolstering community resilience through domestically produced battery energy storage ...

Looking ahead, PowerX remains dedicated to supporting corporate decarbonization initiatives and bolstering community resilience through ...

In Japan, the total installed capacity of rooftop solar has leapt from fewer than 5 gigawatts to more than 20 gigawatts over the past 10 years. In fact, the amount of electricity generated by...

A small town in Chiba Prefecture has created a microgrid--a decentralized electric power system--utilizing locally produced natural gas and solar energy. This innovation exemplifies how ...
