What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:

What is the 836kwh eflex flex battery storage cabinet?

Complete technical details and specifications for the 836kWh eFLEX BESS Liquid Cooled Battery Storage Cabinet system. Industrial facilities and urban areas often struggle to find space for large-scale energy storage solutions. The eFlex 836kWh system is designed to fit into even the most compact spaces.

What is a 373kwh outdoor cabinet?

Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy storage blocks. Designed for 373kWh's to 100MWh+ systems.

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital expenditures (CAPEX).

The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, efficient, and flexible energy storage system.

Equipped with MSD fuses and intelligent Battery Management Units (BMUs), it delivers a safe and stable energy storage solution for even the most ...

Equipped with MSD fuses and intelligent Battery Management Units (BMUs), it delivers a safe and stable energy storage solution for even the most demanding environments.
