In the last few years, we've advanced installing short-duration storage to support the generation of renewable energy, but we still need to develop long-duration ...

The 2025 Gozo Island 1MW/2MWh storage project (a collaboration between Shanghai Electric Power and Enemalta) demonstrates how battery storage could become Malta's energy security game-changer.

Malta's proprietary and proven molten salt long-duration energy storage system provides a unique combination of capacity and duration for which there are no suitable technology alternatives

Malta recently announced a partnership with Siemens Energy to develop heat pump and heat engine components to support a utility-scale 100MW system for 10-200 hours of storage and further scaling ...

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy.

The bank has signed an agreement with Malta Iberia, the regional subsidiary of US TES startup Malta Inc., to support the demonstration of Malta's ...

In the last few years, we've advanced installing short-duration storage to support the generation of renewable energy, but we still need to develop long-duration storage technologies.

Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security.
