How do you pay for a solar system?

There are three main ways to pay for your home solar system: upfront with cash, a solar loan, or through a lease or power purchase agreement (PPA). If you can't afford to pay for your system out of pocket--or don't want to tie up that capital--solar financing allows you to spread the cost over time through a loan or lease.

How much money can a home solar system save?

Most homeowners save around \$50,000 over 25 years. What are your solar financing options? There are three main ways to pay for your home solar system: upfront with cash, a solar loan, or through a lease or power purchase agreement (PPA).

What are the available solar financing options?

Let's dive in with a quick review of the available solar financing options. Solar financing options are divided into two camps. Direct ownership of a solar system can be financed with a cash purchase or a solar loan.

Should you pay for a solar energy system with cash?

Some homeowners opt to purchase their solar energy systems with cash, forgoing the need for loans or payment plans. While this is a major investment, there are solid benefits to paying for a solar energy system with cash. Pros

Leases are another common way of financing commercial solar properties, and they share a number of similarities with PPAs. As with PPAs, the PV system is owned by a third-party ...

Solar financing options are divided into two camps. Direct ownership of a solar system can be financed with a cash purchase or a solar loan. With the cost of solar panels plummeting and a 30% federal tax ...
