---

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the ...

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of ...

Portugal's Greenvolt will spend EUR60M on Europe's largest battery storage hub, boosting EU grid stability, adding skilled jobs at home and lowering energy bills.

As solar capacity expands, battery storage is becoming the essential next step in Portugal's renewable energy evolution. Discover why now is the time to invest in grid-scale ...

As solar capacity expands, battery storage is becoming the essential next step in Portugal's renewable energy evolution. Discover why now is the time to invest in grid-scale energy ...

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and ...

Biogas microplants, batteries, pumped hydro, and emerging technologies like green hydrogen form a stability ecosystem that will allow Portugal not only to maintain its ...
