What are the different types of procurement contracts?

There are three key types of procurement contracts--power purchase agreements (PPAs) or energy storage services agreements; engineering, procurement, and construction (EPC) agreements; and build-transfer agreements (BTAs)--and several key risks that must be allocated between the parties.

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (PPA) is a financial contract in which a third-party developer owns, operates, and maintains the photovoltaic system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

What is a PPA for new energy storage resources?

Some PPAs for new energy storage resources have been structured as capacity-only contracts in which the developer is responsible for the sale of energy and all costs associated therewith--including the costs of the required energy procured from the utility.

There are three key types of procurement contracts--power purchase agreements (PPAs) or energy storage services agreements; engineering, procurement, and construction (EPC) ...

Decide whether to include solar + storage projects in a procurement based on storage benefits for addressing energy cost savings and/or resilience use cases at specific sites.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...

One of the first steps in planning and procurement for local utility storage or solar-plus-storage is to check for contractual and policy barriers that could affect the proposed acquisition.

Procurement contract for ultra-high efficiency photovoltaic energy storage cabinet

Source: <https://spmgsa.co.za/Fri-19-Aug-2022-25426.html>

Best practice, and often a government legal requirement, is to use a Request for Proposals (RFP) for any solar or solar + battery storage contract. Example solar RFP templates are included in the ...

If you're an EPC contractor, project developer, or a caffeine-dependent engineer scrolling through yet another article on energy storage photovoltaic bidding documents, welcome!

One of the first steps in planning and procurement for local utility storage or solar-plus-storage is to check for contractual and policy barriers that could ...

Access the definitive 2026 guide for corporate photovoltaic and energy storage procurement. Learn strategic frameworks to avoid common financial and technical pitfalls while ...
