How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home--but it'll cost you about \$55,000. Why trust EnergySage? Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

Can a 20kW solar system save you money?

Investing in a 20kW solar system can lead to significant savings on your electricity bills. On average, a 20kW solar system can save you up to \$6,205 per year. Over the course of its 25-year panel lifetime, you could save a whopping \$155,125. The cost of electricity has been steadily increasing over the past 40 years.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?
