We analyze your energy requirements and develop on-site power & heat solutions, be it "just photovoltaics" or combined systems made up of PV, battery storage and gas fired cogeneration.

Whether you're located in Bucharest, Cluj-Napoca, Constanta, or a remote village in Transylvania, GSL ENERGY offers state-of-the-art factory-direct lithium battery storage systems ...

Summary: Discover how industrial energy storage cabinets are transforming Romania's manufacturing sector. Explore market trends, energy storage applications, and innovative solutions tailored for ...

The storage system operates a NMC-type lithium-ion battery with a capacity of 6 MWh, produced in Romania and a total output power of 7 MW using 2 central battery inverters from SMA to inject ...

The newly-signed five projects will add a total battery storage capacity of 791.48 megawatt-hours (MWh). The projects are supported by over ...

Summary: Discover how Bucharest households can harness solar energy with modern photovoltaic storage systems. Learn about market trends, cost-saving strategies, and why EK SOLAR leads in ...

The newly-signed five projects will add a total battery storage capacity of 791.48 megawatt-hours (MWh). The projects are supported by over 30 million euros in non-reimbursable ...

Trina Storage, the energy storage division of Trina Solar, has teamed up with Allview, one of Romania's leading EPC contractors, to develop a Battery Energy Storage System (BESS).
