-----

The modular design enhances flexibility in parallel connection schemes and offers higher energy density, significantly improving the economics, safety and ...

372 kWh liquid-cooled cabinet battery storage system. Intelligent liquid-cooled temperature control, reduce system auxiliary power consumption. Configure the ...

It integrates a high-voltage LFP battery with a capacity of 372KWh and a power rating of 150KW, making it suitable for both commercial and industrial applications. The system includes a Battery ...

The 372kWh LiFePO4 Solar Battery Storage Cabinet is a renewable energy commercial and industrial-scale intelligent energy storage system. Engineered with superior quality lithium iron phosphate ...

The modular design enhances flexibility in parallel connection schemes and offers higher energy density, significantly improving the economics, safety and construction convenience of energy storage projects.

Collects BMS data and key environmental parameters, enabling comprehensive health monitoring, risk prediction, and early warning of cells. Detects early thermal runaway signs using acoustic AI ...

It integrates a high-voltage LFP battery with a capacity of 372KWh and a power rating of 150KW, making it suitable for both commercial and industrial ...

Designed for industrial and commercial use, the BESS-372K liquid-cooled battery system delivers reliable 372kWh capacity. Featuring virtual synchronous technology and robust safety, it's ideal for ...
