How do I choose a 47U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 47U rack or cabinet can house equipment whose total height when placed into the rack is no more than 2.09m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device.

What is a 47U rack?

With internal depths from 600-1200mm, these 47U racks are designed to house standard 19inch rack mountable devices using slide rails, shelves or trays. Additional cabinet options cover lockable front and rear door types, cable management and blanking plates for efficient air flow management.

How tall should a 47U rack be?

A 47U rack or cabinet can house equipment whose total height when placed into the rack is no more than 2.09m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device. For reference 1U=1.75inches or 44.45mm.
