This policy promotes the full market-based determination of on-grid electricity prices for new energy sources, including ground-mounted and distributed PV projects, as well as onshore and ...

China's solar and windfarms would no longer be guaranteed sales at a fixed price linked to coal benchmarks, under a new policy released by the central government. The policy asks local ...

China's energy regulator pledged to crack down on cut-throat competition and overcapacity in the solar manufacturing sector, as the industry struggles with a prolonged downturn.

China's domestic solar module installations plunged to a record low in August as rising prices and policy shifts have prompted developers to reassess project viability amid weakening ...

In many provinces, the spot market price for solar is lower than the coal benchmark price. Developers are rushing to install solar projects ahead of the June 1 deadline as a result...

The analysis reveals that three converging factors -- polysilicon consolidation, supply-side production cuts, and the cancellation of China's 13% VAT export rebate -- will drive solar module ...

China's breakneck build-out of solar power, fuelled by rock-bottom equipment prices and policy support, is slowing as grid bottlenecks pile up, market reforms increase uncertainty for...

Solar energy is the most common, cheapest, and most mature renewable energy technology. With solar photovoltaics taking over recently, an in-depth look into their supply chain ...
