In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

The batteries installed under the programme could provide up to 300 MWh of electricity storage per year, increasing the supply of renewable energy ...

The Apollon PV Park has commissioned a 3.3 MWh battery energy storage system (BESS) and solar project, in a milestone for Cyprus.

Together, the solar and storage components are designed to support grid stability, reduce curtailment, and help manage peak demand. Images from the site show a containerised ...

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, ...

TotalEnergies is betting big on the solar power market in Cyprus. It won the environmental approval for a photovoltaic park of 100 MW in peak capacity, with energy storage.

As the global energy system continues its transition toward sustainability, Wenergy remains committed to delivering reliable, cost-effective, and clean energy storage ...

TotalEnergies is betting big on the solar power market in Cyprus. It won the environmental approval for a photovoltaic park of 100 MW in peak ...
